

# Pebble Flow Factsheet

\*Specifications of the pre-production model. Final product specs may vary.

## Specs

- **Dimensions:** 25' L, 7'6" W, and 8'8" H
- **Required towing capacity:** 6,200 lbs
- **GVWR:** 6,200 lbs
- **Murphy Bed:** Queen
- **Dinette Convertible Bed:** 50"x80" (larger than a full)
- **Fresh Tank:** 37-gallon
- **Grey & Black Tank:** 50-gallon
- **Fridge:** 6cu ft (169L)

## 100% Electric

- **45kWh Lithium Iron Phosphate battery:** LFP is the safest EV battery technology on the market. The size of this battery provides the capacity to power all of the Pebble's appliances and stay off-grid for up to 7 days.
- **>1 kW Solar Integration:** Rooftop-integrated solar panels provide continuous energy for self-charging on the go or when parked. It's like being perpetually plugged into a 110V outlet under ideal conditions.
- **Onboard AC Power:** Capable of powering all appliances onboard at once.
- **Universal Charging:** The Pebble Flow is compatible with AC/DC charging at public charging stations, at home or at campgrounds.
- **240V AC Output:** Fully Capable NEMA 14-50 Outlet for providing power to campsite equipment, EV, or another RV
- **Emergency Home Energy Backup Solution:** With a battery capacity 3.5x that of a Tesla Powerwall, the Pebble Flow makes a great home backup battery in case of emergencies.
- **World's first Dual-motor Active Propulsion Assist System:** Makes towing safe and effortless, intelligently providing power to maximize the vehicle's travel distance, whether towing with a gas vehicle or an EV.

## Design & Layout

- **Aerodynamic Design:** We've spent countless hours refining the curves and lines through advanced computational simulations. The Pebble Flow is 300% as aerodynamic as a conventional travel trailer. Better mileage, longer range, and an overall safer towing experience.
- **Wrap-around Windows:** Giving way to a 270° view and a roof panel with constant sky views.
- **Room Flip:** Lightweight, flexible configurations that move from leisure to work time within seconds.
  - The queen bed converts to a work-from-anywhere office.
- **Sleeping Capacity:** sleep up to 4 people with 1 convertible Murphy queen bed and 1 convertible full bed
- **Storage:** Ample interior storage + 1 exterior passthrough storage
- **Kitchen:** Removable induction cooktop, a 4-in-1 convection microwave and a full-size fridge. The flip-up service window gives flexibility to cook inside or al fresco.
- **Lighting:** Multi-zone dimmable lighting

- **Bathroom:** One-touch privacy electrochromic glass, full-size separate shower and toilet, on-demand hot water, and vanity lighting

## Technical Features

- **The Pebble App:** All features are controlled by the Pebble app, giving users control over every part of the RVing journey.
- **Remote Control:** Once unhooked from the hitch, the Pebble Flow is fully remote-controlled for easy parking and maneuvering, effortlessly pivoting and positioning itself into tight spots.
- **InstaCamp:** The push of a button deploys or retracts the awning, stairs, leveling stabilizers and Electric Parking Brakes to set up camp or get back on the road in seconds.
- **Magic Hitch:** The Pebble Flow uses its unique robotic software to sense the surroundings and automatically hitch itself to your vehicle, all controlled by the Pebble app.
- **Easy Tow:** The Pebble Flow has electric motors onboard, creating the world's first dual-motor Active Propulsion Assist System. The Active Aero at the front of the vehicle automatically deploys to make the Pebble Flow more aerodynamic. The result is maximized range, and an effortless, safe towing experience, removing range anxiety when towing with an EV.
- **Remote Connectivity:** The Pebble Flow is plug-and-play-ready for Starlink and mobile data so you can be connected wherever you are. Separate hardware, subscription, and cellular plan required for activation.
- **OTA Updates:** With onboard intelligence, the Pebble Flow is always evolving and improving with regular over-the-air software updates and new features.
